Ok, Workshop 2 it is then. Note that participants should come with a paper or a draft paper that they have authored or co-authored. Will all MS students have one?

I want to arrive on Sun Aug 28 and leave after the summer school on Sep 9.

I'd like to run the workshop on Monday Sep 4 since it's a holiday in the US and that's the only date I won't have to teach remotely my classes from there.

Let me know if this works.

Dear Hakan,

I would like to start the procedure for your reimbursement and honorarium.

For the honorarium you might need to go through a work visa procedure. Elena Gabardi (in CC) can help with it in case.

By now I would need only your preferred day for the tutorial and your dates of arrival and departure.

Thank you

Best regards

Barbara

Hello Barbara et al.,

Here is what I propose:

<https://docs.google.com/document/d/1usVf21EUpz1D66DV16g9E3eyJnweR6Ao5n9I9iyFEfQ/edit?usp=sharing>

Burak told me that it will be mostly MS students. The second workshop is most beneficial for PhD students. I am not sure whether your MS students write papers. There is also a third, follow-on group activity to Workshop 2, called the Reading Circle. That one is an extra day to 1.5 days, and it uses a study group format. I have excluded it since it's suitable only for PhD students.

Let me know if you have any questions.

Regards - Hakan

Ok Barbara, thanks for getting back to me.
I'll coordinate with Burak, and send you something this week.

Regarding 2 (my dates):

Since our semester starts on Aug 28, to minimize my time away, I'd have to arrive on Sun Aug 28 and leave after the summer school on Sep 8 or 9.

I'll need to teach some of my classes remotely, meaning I'll need high-speed internet in the middle of the night (from midnight to 3am) a few times while I am there. I prefer to be in Bolzana the whole time.

Also for the first week I will be there, maybe we can plan for other activities/collaboration to make it worthwhile/productive. We can discuss this later.

Cheers - Hakan

Dear Hakan,

sorry Hakan I did not mean to push you so much. I just needed to have an idea to set up the web page of the school.

About your questions:

1. I am working on it. I have the money to pay your trip in addition to the 2500 Euro, but I am investigating how to do it.

2. I spoke with Burak about your second topic. I think it is pretty fine. It would be nice if you could have a practical session.

I have a couple of students working on the web pages still this week. Would it be possible for you (and Burak) to have your info this week?

Thank you
Best regards
Barbara

Hi Barbara et al.,

Thanks again for the invitation. I have a few question regarding funding and possible topics.

- What does the funding amount of 2,500 Euros cover? This seems low for a person visiting from North America for two weeks, depending on the airfare. Are speakers expected to cover the remainder of their expenses themselves? Any other sources to make up the difference? I need to know more before firming the commitment.

- Topics: Are there any preferred topics or any gaps? This would be useful to know. I was thinking about a two-part contribution:

1) a tutorial/workshop on a technical topic: focusing one or more of: testing, measurement, study/pilot design, software economics

2) a skills development workshop on writing papers: I have done this internationally including NTNU/SINTEF and Oulu. Burak knows about it (in fact it would be great if he could help since it's a bit difficult to run as one person).

What are your thoughts?

- Thursday is a bit short notice to decide on the topic. This week is the end of the quarter semester and exam time here. I could send the other info, but could you give a bit more time for the topic/abstract? I'd like to think some more.

Dear Hakan,

I am very glad you accepted to speak at the SESchool on September 4-7. The school on Software Engineering is addressed to PhD and MSc students. This year it will also host 17 EMSE second-year students. EMSE is the Erasmus Mundus MSc program that

the University of Oulu, the Universidad Politecnica de Madrid and the Technische Universitaet Kaiserslautern and my university coordinate together. The program is funded by the European Commissions (Erasmus Mundus).

I would like to start the organisation of the school and your staying. The school this year is funded by the Erasmus Mundus program, so the speakers are requested to stay in one or more of the four universities for two weeks. We allocated for each speaker about 2500 Euro for these two weeks.

Thus, by now I need from you two things:

1. Your full name affiliation, a short bio, title of your tutorial, format of the tutorial, and one paragraph description to publish on the web.
2. The time window (including the school dates) you'd like to stay at the universities of the EMSE program. You can stay at my university the whole time or travel to any other university of EMSE.

As we are publishing the conference page this week, I kindly ask you to reply with this information by Thursday (?).

Thank you

Best regards

Barbara
